

Muhammad Junaid Arshad

Nationality: Pakistani **Date of birth:** 14/01/2003 **Place of birth:** Quetta, Pakistan **Gender:** Male

 **Phone number:** (+92) 3112122532  **Email address:** junaidarshad439@gmail.com

ABOUT ME

Software Engineer with expertise in MERN stack and Shopify app development. I have experience building scalable web applications and custom Shopify solutions that enhance merchant experiences and drive growth. Open to both on-site and remote opportunities in the US and Middle East.

WORK EXPERIENCE

 **Nedian Technologies** – Quetta, Pakistan

Shopify App Developer

[15/12/2024 – Current]

Experienced in developing both custom and public Shopify apps with a focus on increasing store performance and user engagement. Specialized in integrating LLMs to deliver personalized product recommendations on Shopify storefronts. Proficient in Remix, Node.js, Next.js, Hydrogen, and Polaris. Successfully contributed to a 23% increase in subscription growth for Shopify merchants.

Worked on Growthly AI — a Shopify app that analyzes customer behavior using AI to automatically generate hyper-personalized subscription bundles, boosting retention and eliminating the need for manual curation.

 **Fiverr** – Quetta, Pakistan

Freelancer

[10/03/2021 – 15/05/2024]

I have experience working as a freelancer on Fiverr, where I provided services to a diverse range of clients from various industries. Through this platform, I've honed my skills in managing projects independently, meeting client expectations, and delivering quality work within set timelines. My time on Fiverr has also strengthened my communication abilities and taught me the importance of adaptability and client satisfaction in a fast-paced, results-oriented environment.

EDUCATION AND TRAINING

BS Software Engineering

Balochistan University of Information Technology Engineering and Management Sciences [15/10/2020 – 05/08/2024]

City: Quetta | Country: Pakistan | Website: <https://www.buitms.edu.pk/> | Level in EQF: EQF level 7

PROJECTS

[15/12/2024 – 10/06/2025]

1: Growthly AI — Shopify App AI-Powered Customer Retention & Subscription Optimization. Developed a Shopify application that leverages artificial intelligence to analyze customer behavior and purchasing patterns. The app automatically generates hyper-personalized subscription bundles, enhancing customer retention and reducing churn. By automating the curation process, it enables merchants to boost sales efficiency and deliver data-driven personalization without manual effort.

Tech Stack: React, Node.js, Shopify API, PostgreSQL, AI/ML APIs

Talkify - AI-Powered Voice Search Platform Built a full-stack Shopify app enabling voice-activated product search. Architected a React/TypeScript frontend with Shopify App Bridge integration and a Node.js backend API. Integrated AI for speech-to-text and intelligent keyword extraction. Implemented real-time audio processing with Web Audio API, subscription-based billing, usage analytics, and a customizable storefront embed widget. Deployed on Vercel and Render with PostgreSQL database integration.

Link: <https://www.talkify.space>

Ciphermail - End-to-End Encrypted Email Platform Built a full-stack encrypted email application using Next.js, TypeScript, and PostgreSQL. Implemented client-side encryption with Web Crypto API (RSA-OAEP, AES-256-GCM), ensuring messages are encrypted before transmission. Developed secure key management, JWT authentication, and a responsive UI with dark mode. Designed database schema with soft-delete and search capabilities. Maintained zero-knowledge architecture where servers cannot access plaintext.

Technologies: Next.js, React, TypeScript, PostgreSQL, Web Crypto API, JWT, Tailwind CSS

[06/06/2025 – 20/06/2025]

2: Savvy Energy Website Collaborated with the Savvy Energy team to develop and optimize a modern, responsive website using cutting-edge web technologies. I implemented clean and scalable front-end components while integrating features that enhanced overall performance. Emphasis was placed on ensuring cross-browser compatibility, accessibility, and adherence to SEO best practices. These efforts resulted in improved site speed, user engagement, and a streamlined UI/UX experience.

4: Falcon 9 and Falcon Heavy Launch Prediction Applied machine learning algorithms to predict the success rates of Falcon 9 and Falcon Heavy launches, leveraging data-driven insights to enhance predictive accuracy. Developed and trained models to analyze historical launch data, showcasing the potential for increased reliability in space mission planning.
